# Leonardo Centurion

Senior Software Engineer at Mulesoft/Salesforce  
Comuna 1, Buenos Aires Province, Argentina

## Summary

Software Engineer from Argentina.

I enjoy software in all its forms and I enjoy using it to solve problems.

### Experience:

I've got professional experience in systems programming using Rust + WASM. I've done micro-services in Typescript. I've done front ends in React. I've worked in e-commerce services written in Java, using Solr, and mysql.

### Relevant projects:

I'm currently a student at FIUBA in a masters degree in AI. My thesis is using machine learning, specifically using LSTM transformer architecture, to predict Crypto currencies prices and apply that to a trading bot.

My graduation project consisted of implementing, in Rust, the Raft coordination algorithm for a distributed system for embedded devices (no-std, and no heap allocation).

Languages: Rust, Java, Javascript, Typescript, Python, Erlang (Hobby).

Other: Linux, Kubernetes, Envoy, Docker.

---

## Experience

### MuleSoft

Senior Software Engineer

February 2025 - Present (7 months)

Buenos Aires y alrededores

Mulesoft/Salesforce

## Software Engineer

August 2021 - March 2025 (3 years 8 months)

CABA

## QUBIK DIGITAL

Java Software Engineer

September 2020 - August 2021 (1 year)

Buenos Aires y alrededores

## Creative Coefficient

Desarrollador de Java y Java EE

March 2020 - September 2020 (7 months)

Buenos Aires, Argentina

Fullstack developer. Java, Angular, MySQL

---

## Education

Universidad de Buenos Aires

ingeniería en informática, sistemas distribuidos · (2014 - 2021)
